FALL AND WINTER SEASON 1952—1953 UNUSUAL FLOWER BULBS

Johnson Brothers

UNION AVE., R. D. NO. 2, SOMERVILLE, N. J.

MAILING ADDRESS: P. O. BOX 463

BOUND BROOK, N. J.

In handling these amazing bulbs from year to year we are reminded continually of the verses in the BIBLE, Matthew 7, 28-29: "Consider the lilies of the field, how they grow, they toil not, neither do they spin and yet I say unto you that even Solomon in all his glory was not arrayed like one of these".

Our primary aim in this business is to distribute these marvelous bulbs to others so that they too may enjoy their rare beauty.

With this thought in mind we contract for only the choicest bulb stock, import them direct, advertise them truthfully and at a reasonable price and pack them carefully for shipment to you.

DUTCH HYBRID AMARYLLIS

LUDWIG STRAIN

Following pages list varieties available with brief descriptions and prices, which void all previous prices. These fabulous bulbs will be available late in November for shipment, we suggest that you order early to assure obtaining the desired varieties.

Upon arrival unpack carefully and plant one bulb to a 6", 7" or 8" clay pot using a mixture of equal parts of decomposed cow or rabbit manure, leaf mold and medium weight garden soil all well mixed.

Place bulb so that top half is above surface of soil spread roots carefully and water lightly till flower stem appears when water should be increased gradually. It is far better to underwater than overwater.

Once monthly apply liquid feed. As blooms fade and wilt cut them off and as each flower stem is finished cut it off unless you desire to grow seed in which case cut nothing off till seed pods fully develop and ripen.

Permit foliage to grow on vigorously as this growth produces the flower buds for the following season, a very important cycle. When foliage shows signs of dying reduce water gradually (this should be about late summer) then when foliage has fully died down remove it with a sharp knife and place the pot in a cool semi dark location to rest bulbs.

When new shoots appear start to water, remove to normal light and follow same procedure as when planting. Bulbs can be kept in the same pot for three to five years, till there is no more room for the roots then replant in next size pot.

VARIETIES IN RED SHADES

AMERICAN EXPRESSoutstanding medium red, self color—8½" blooms rated AA at Vallee-vue test gardens 1950-51	\$ 4.50
AMERICAN FASHIONpeculiar rose color of the Rhododendren blooms, these flowers are per-fectly shaped 8" across	\$ 7.50

Last but not least are the MINIATURE Dutch hybrid AMARYLLIS, the GRACILIS free flowering and producing elegant long lasting blooms three to four inches across. Every collection should have at least one as a contrast. Available in colors only, from light red thru orange to dark red. These are mixed so just order without specifying shade. — Price each \$3.00

This completes our current list of Dutch hybrid Amaryllis bulbs, LUDWIG Strain. We doubt if you can find a more complete list of varieties to select from. All LUDWIG strain Amaryllis bulbs are not less than 26. cm size unless otherwise specified.

SEED from these famous LUDWIG strain Amaryllis novelties available till the end of this year or until sold out. Seed from color varieties, mixed, 20 for \$1.00 or from white varieties mixed, 12 for \$1.00.

LYCORIS BULBS — IMMEDIATE SHIPMENT — PLANT NOW

LYCORIS SQUAMIGERAhardy Amaryllis **HALLI** — commonly called the JAPANESE MAGIC LILY. Grows a graceful straplike foliage which dies down in late summer then about a month later there suddenly appears stems to 2 to 3 feet which produce umbels of fragrant dainty lavender rose blooms 3" across. Every garden should have at least two small groups of six bulbs each. One of the last outside flowers to bloom in the north.

6" circumference bulbs \$3.50 per dozen

7" circumference bulbs \$3.75 per dozen

8" circumference bulbs \$4.00 per dozen

LYCORIS AUREAGolden Spider Lily — while this variety is not quite so hardy as the Squamigera, with added precautions it can be grown outdoors as far north as Baltimore if mulched. Try it in your locality with one bulb. The Aurea while not fragrant produces a cluster of rich orange yellow flowers (6 to a cluster, each flower 2" across) during late September and early October after foliage has died down same as the Squamigera except that the Aurea stems are only about 12" tall. As cut flowers they last several weeks. Further north they are used as indoor pot subjects. 5" circumference bulbs\$5.00 per dozen.

LYCORIS RADIATARed Spider Lily — same as the Aurea except that the flowers are red and more spidery in appearance, slightly smaller and stems somewhat shorter. 4" circumference bulbs\$2.50 per dozen.

TENDER EASTER LILY BULBS

Can be grown outdoors in the deep south otherwise they are an indoor pot subject in the rest of the country.

ERABU — available now in 9" to 10" circ bulbs at..... 60c each 3 for \$1.50

GIGANTUM — available late November in 10" to 11" circ bulbs at \$1.00 each or 3 for \$2.75

HARDY LILY BULBS

Gold Banded Japanese Lily, **AURATUM PLATYPHYLLUM**, very fragrant 9" to 11" circumference bulbs

75c each, or 6 for \$3.75

RUBRUM SPECIOSUM, Crimson Banded Japanese Lily in 11" to 13" circumference85c. each or 6 for \$4.25

L. HENRY I, a tall robust species growing to about 8 feet. 9" to 11 circumference bulbs..... 85c each or 6 for \$4.25

3 bulbs of each variety, labeled, total of 9 bulbs \$ 7.00 6 bulbs of each variety, labeled, total of 18 bulbs \$12.00

The **AURATUM** and **RUBRUM** growing to 5 to 6 feet grouped with the **HENRY I** make an unforgettable picture of combined beauty with their gorgeous reflexed petals amazingly marked and dotted. The delicate fragrance of the **AURATUM** completes the picture.

L. HENRY I should have support as the tall stems often produce as many as twenty blooms.

Above hardy lily bulbs will be available in December, therefore in areas where the soil will be frozen at that time we suggest that the hole be dug and prepared and the soil for covering bulbs as well as the hole be covered with a bag, basket or boards to prevent freezing so that bulbs can be planted without difficulty upon arrival.

Sometime in November we will have a fabulous little S. African bulb known as the **BABIANA**, an indoor subject in the north producing several red to purple red wide open blooms on about one foot stems late in the winter indoors, spring bloomers in the south planted outdoors.

This bulb grows a very unusual foliage, the leaves being hairy and appearing to be plaited.

Top size blooming bulbs \$1.25 per dozen.

TERMS OF SALE—

Cash, check or money order with order.

All orders subject to prior sale.

We are not to be held responsible for any discrepancies beyond our control. In the case of lost or damaged or unusable bulbs received from us we will be responsible for only the purchase price in the form of either replacement or a refund.

We in turn will guarantee all bulbs shipped to you to be true to name, reach you in good condition and perform satisfactorily and that they are choice selected stock in healthy condition.

We pay parcel post charges to your destination unless otherwise specified. We acknowledge orders within 24 hours and ship your bulbs not later than the following day (excluding Sundays) except in cases where the bulbs ordered have not reached us from the growers.

Sincerely yours,

JOHNSON BROS.
